

# BEST IN GLAS

Heiler®-genuine glass showers unikat®

„wimps“.  
get used to the  
feeling of  
being envied.

Heiler®-genuine glass showers – the most beautiful way to relax.

„perfectionists“.  
don't be modest –  
demanding clients  
are our specialty.

Heiler®-genuine glass showers – don't expect much, expect the very best.

# „individualists“. every day is unique – soon for you too.

Heiler®-genuine glass shows –  
individuality at the very highest level!

With Heiler® every bathroom becomes a unique piece of art because each one of our glass showers is made to order especially for you. We start with the measurements, develop and manufacture the glass and fixtures in our own glass manufacturing facility and assemble everything on the spot – professionally and without any hassles. With our long-standing partner-oriented service offering we ensure you maximum enjoyment of your dream shower. And because we are absolutely convinced of our perfection and customized workmanship we offer a five-year guarantee on our products and services and 13-year availability guarantee on all spare parts.

Join us in the world of Heiler®! Benefit from more than 20 years of experience in the manufacture and assembly of genuine glass showers.

Turn your bathroom in your very own wellness oasis. Our quality without compromise is the foundation of our brand – from measuring to cleaning up after assembly as well as our comprehensive guarantees. We stand for security, competence and partnership with products „Made in Germany“. Experience the perfection of Heiler® and create your own feel-good experience of that special kind – your special kind.

We look forward to receiving any questions or feedback you may have!

Boundless Glass Showers

unikat® | absolut®

Take the liberty to do what you want! With the fitting line absolut® your imagination is truly the measure of all things. Whether you require fixtures in stainless steel, individually curved or processed glass or specially refined materials for the perfect shower, with this range, Heiler® realizes your most extra-ordinary design concepts.

How about gold, polished brass or stainless steel? With our own in-house glass manufacturing facility, we have no problem offering glass thicknesses of up to 19 mm – mitered edges as well as printed motifs are no problems at all. Do not accept any limitations. Let our Heiler® experts advise you in the development of your very own unique specimen. Or simply give us a sketch and we will turn your idea into a reality – down to the very last millimeter. Put your imagination and our perfection to the test!

absolut®!

Round glass showers

## unikat® | Round

Do you prefer soft, flowing forms and vibrant transparency? Opt for our incomparable unikat® round showers. Any arc radii can be individually realized fully in line with your requirements, so that your unikat® is gracefully designed adding noble and incomparable accents to your bathroom.

After our assembly experts have taken exact measurements, all Heiler® round showers are produced at our own production facilities. And it doesn't matter whether you are using a more „common“ radius such as 500 or 550, or you have your eye on a more extra-ordinary custom solution. As an alternative to our wall brackets heilift®, classic® and heiswing®, the clamping profile variofix® can also be used.

### unikat® | modul®

The module showers by Heiler® convince with their ability to meet with your exact requirements. They are suitable for pools and wellness facilities alike – these modular pieces of art turn boring communal showers into a pleasant showering experience of the highest standard.

Whether mounted to the floor, with base columns for even easier cleaning or in connection with unidrain® shower drain channels – with modul® you benefit from a Heiler® solution that fully complies with your constructional situation and your personal wishes. For this, you can make use of a variety of design options from the unikat® range: from customized glass with individual screen print or cast and structured glass up to filigree, high-quality fixtures.

All models  
can be extended  
upon request  
**unidrain®**

# sociable.

Module Glass Showers

### modulrinnen®

The flexible unidrain® module system 1100 is a solution for special-sized showers. This series offers true freedom – turning any floor drain into a stylish element in your shower.

The simple system consists of just four elements and enables a barrier-free solution with a unilateral inclination towards the wall. This not only ensures a simple and absolutely water-tight installation, it makes showering even more pleasant than in traditional communal showers.

# stylish.

unikat® | fittings

Why shouldn't esthetics and functionality be combined? With high-quality Heiler® shower fixtures you can actually experience this symbiosis. Filigree technology, and its virtual weightless appearance puts your genuine glass shower wall in the spotlight. All Heiler® fixtures are made of high-quality, massive brass with expert surface refinement.

The unikat® fitting ranges absolut® and modul® top even that – absolut® and modul® are available with all standard unikat® fittings and therefore offer individual design options at the very highest level.

## heilift®

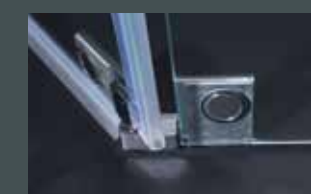

Flush-mounted fixture by Heiler® with a lifting and lowering mechanism. With an eye for detail, Heiler® has developed an extremely filigree and highly durable lifting/lowering hinge. Thanks to the use of hardened metal this door can be lifted even after several years of service – without any signs of wear and tear. If you are looking for a proven heilift® technology together with a swinging function, heiswing® is just the right thing for you

## heiswing®

The internal flush-mounted fixture is equipped with the high-quality Heiler® lifting and lowering device made of hardened metal and is therefore extremely durable.

Its swinging function provides for maximum moving space and optimum usage of space - even in small bathrooms, e.g. as a folding solution. Together with unidrain® shower drain channels, doors equipped with heiswing® can be easily folded neatly away inward.

## move®

This patented Heiler® system made of high-quality aluminum for use in suspended glass sliding doors. This system does not require any guide rails which increases comfort and enables a fully frameless entrance to your shower.

## heislide®

Intelligent sliding door technology with its filigree design and highest user comfort! Invisible slide bases ensure smooth gliding – and that at a lifting capacity of up to 60 kg and more. heislide® is the optimal solution for frameless designs as this concept does not require guide rails and a fully suspended construction is possible.

## classic®

The proven and reliable big gun of the Heiler® hinges. Solid design, very strong and highest quality! A classic!

## variofix®

This high-quality and subtle aluminum clamping profile for precise wall mounting. It elegantly evens out wall irregularities of +/- 10 mm and is available in glossy and matt. Heiler® variofix® can also be combined with the wall brackets from the ranges heilift®, heiswing® and classic®.

# vista.

unikat® | glass

Crystal-clear perfection is what we produce at the Heiler® manufacturing facilities. Here we produce glass for our showers and interior solutions fully in line with your specifications and quality requirements. For all of our Heiler® products we only use the highest quality single pane safety glass (ESG) according to DIN EN 12150 – for plane glass in 8 mm as well as curved glass in 6mm thickness. We can adjust the thickness of the glass for special designs fully in line with your requirements. Why accept any less?

We offer you all glass variations, glass colors and finishes for your unikat® that the market has to offer. Make use of the diverse range of possibility of the art of glass-making with crystal-clear glass, screen printing or structured glass with or without cleantec® surface protection – which even further simplifies glass cleaning with its water-repellant properties. Every idea can become a reality. With our in-house production facilities we do not have to rely on external suppliers and can always ensure the proven Heiler® quality and guarantee.

# invisible.

unikat® | Sealing gaskets

Heiler® sealing gaskets particularly convince with the fact that one is hardly even aware of them. Yet they still fully fulfill their function as they were especially developed and manufactured for genuine glass showers. For each installation solution we have the optimal sealing gasket, so that you can sit back and relax because there is absolutely no need for you to compromise the design and appearance of your shower.

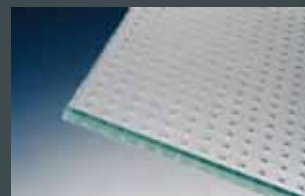

In addition, all sealing gaskets are removable and exchangeable. After all, you are the one who should be having the fun – while we take care of the shower!

# unidrain®

Drain channel system

## Infinite possibilities

With Heiler® genuine glass showers you can rely on their exclusive unidrain® the sophisticated patented shower drain system, straight from the inventor.

With over 160,000 installations – without one single complaint – this drain channel system is simply genius and is optically aligned to the esthetic and first-class world of Heiler® showers. unidrain® has a strong design – and can be individually combined with glass, tiles or Corian. unidrain® is exclusively available from Heiler® in Germany.

And even better: unidrain® can be installed in any Heiler® shower solution simply and hassle-free. Installation is conceivably simple with just four installation components and one universal, water-tight flange technology.

Individual line solutions in any length can be realized. The system is suited for any floor construction (concrete, wooden flooring with floor plate and screed layer, wooden flooring with light concrete pours). unidrain® also fully complies with die noise protection standards as per DIN EN 1253-1 and 1253-2. With its high drainage rate of more than 0.8 liters/second and ultra-easy cleaning via removable sieve, there is no reason not to install unidrain®! For plane floor constructions, the ultra-flat drain enclosure with a height of less than 80 mm is the measure of all things.

Opt for a fresh and elaborate design and upgrade your shower considerably – with unidrain®!
